Shihgot’ine (Mountain Slavey) Practical Syllabics

Onset Vowel Final Notes:

• A dot over a o-syllabic
indicates the vowel /u/:
ᓄ is /no/ while ᓅ is
/nu/.

• The dot over an e-syl-
labic indicates the /ǝ/
vowel sound: ᓀ is /ne/
while ᓀ̇ is /nǝ/.

• Tone is not generally
included when writing in
Practical Syllabics. High
tone can be indicated
with an accent over the

syllabic: e.g. ᐊ́, ᑌ́. Tone
might only be written: for
pedagogical purposes, for
a dictionary, or to specifi-
cally mark a syllable for
tone to disambiguate the
word.
