Notes

- To type the *apostrophe accent* ' use the **backquote key** ` — *ń* is typed **n** then **backquote**
- To type the *grave accent* ` use the **backslash key** \ — *à* is typed **a** then **backslash**
- To type the *acute accent* ' use the **shift+backslash key** — *á* is typed **a** then **shift+backslash**
- To type the *š* use the **Left Bracket key** [
- To type the *ł* use the **Right Bracket key**]
- To type the *ə* use the **Semicolon key** ;
- To type the *glottal stop* ʔ use the **Slash key** /
- To type the *raised* ^h use the **Shift+6 key** ^
- Wentulenyo special characters can also be typed by holding down the **Right-Alt** or **Option key** at the same time as typing a letter key. These key combinations are indicated on the keymap by a small letter to the right of the main character. The *barred-i* is typed **Right-Alt+i** (Windows) **Option+i** (Mac).
- You can type the English key value by holding down the **Right-Alt** or **Option key**. The semicolon ; is typed **Right-Alt+;** (Windows) **Option+;** (Mac).
- Opening and closing quotes. For Mac users, Right-Alt is either of the Option Keys.
 - single: ' Shift+Backquote — ' Apostrophe
 - double: “ Right-Alt+7 — ” Right-Alt+8
 - single ‹ Right-Alt+Shift+9 — › Right-Alt+Shift+0
 - double « Right-Alt+9 — » Right-Alt+0
